## 1 OVERVIEW

The Software Design Document is a document to provide aid for the software development process by providing detailed information on how the software should be built. Additionally providing information on interactions between different pieces of software and users through use cases, UML diagrams, and other supporting information.

### 1.1 Scope

This Software Design Document is used to record design information and communicate design information to project stakeholders. This Software Design Document also provides the details of required functionality for the Many Voices Publishing Platform, a textbook creation platform for publishing textbooks.

### 1.2 Purpose

The purpose of this document is to describe the implementation of the Many Voices Publishing Platform (MVP Platform) software. The Many Voices Publishing platform is designed to allow for the creation of textbooks by College and University professors or any person interested in creating their own textbook.

## 2 DEFINITIONS

Aurelia	A JavaScript client framework for mobile, desktop and web leveraging simple conventions and empowering creativity [?].
Alpha Test	Limited release(s) to selected, outside testers (Friends and Family)
Beta Test	Limited release(s) to cooperating customers wanting early access to developing systems (Professors and other educators)
Federated	Individual parts that stand as an individual but can be combined into a single unit
Final Test	Release of full functionality to customer for approval
PDF	Portable Document Format, that is able to combine text, graphics, and other information into a single document

## **9 CONCLUSION**

The Many Voices Publishing Platform is a combination of User Interfaces, Documentation, User Centered Design, Testing, User Authentication, Databases, Server Back-end, Text Formatting, Password Storage, and the users themselves. Determining the technologies behind these parts and pieces is a difficult task to accomplish, as many choices can satisfy the requirements of the project. Finding the best solution however is the goal of this document, to provide a clear path forward for the platform as a whole.
